Ship-Breaking.com

Escaped from breaking

**Tahoma Reefer.** The Estonian reefer immobilized since August 2006 after a fire in Monrovia had been sold for demolition in September 2006 to India for $283/ton. Anchored outside of the port, at the request of the local port authorities, she has been resold in March 2007 to a Bulgarian owner but then was stolen by pirates in mid-May. Her fate today is unknown. (see the press release of Robin des Bois “To-be-scrapped vessel stolen in Liberia” » [http://www.robindesbois.org/english/sea/tahoma.html](http://www.robindesbois.org/english/sea/tahoma.html), May 21st 2007 and the global statement 2006 on Ship-breaking, p. 15, [http://www.robindesbois.org/english/shipbreaking.pdf](http://www.robindesbois.org/english/shipbreaking.pdf).

![Tahoma Reefer, Monrovia (Liberia), August 2006](https://www.robindesbois.org/images/tahoma.jpg)

**B Sea.** The Turkish bulker under the Georgian flag *B. Sea* (ex-*Manyas 1*, ex-*Superior*, ex-*Transocean Progress*, ex-*Sea Glory*) built in Japan in 1976 and regularly detained for deficiencies, has been sold for demolition to Bangladesh (details in the #8 bulletin, page 11, [http://www.robindesbois.org/dossiers/a_la_casse_10703.pdf](http://www.robindesbois.org/dossiers/a_la_casse_10703.pdf)). She arrived on site in Chittagong (Bangladesh) on March 15, 2007. The ship has since become the *Woqoof-E-Mujdaleza*, and is currently in repair for a continuation of her career. The departure from Bangladesh initially predicted for June 30 has been pushed back to July 15.
Follow-up

**Majori.** In bulletin #8 of Ship-Breaking.com and according to a picture of the *Majori* tanker under the bridge of Saint-Nazaire, we put forth the assumption that this tanker of the Erika generation, in her poor conditions, proceeding after the Loire estuary towards Bangladesh for demolition, had brought raw materials to the Total Donges refinery (see page 3, [http://www.robindesbois.org/english/shipbreaking8.pdf](http://www.robindesbois.org/english/shipbreaking8.pdf)). The director of the Donges refinery informed us that the *Majori* had in fact unloaded molasses. Indeed in Montoir, the *Majori* unloaded 10,000 T of this thick and viscous sugar by-product used as food for the animals for the Soufflet firm. An explosion destroyed a molasses tank on October 7, 2002 in the Soufflet’s storage. Collateral damages, broken panes and roofs affected the neighboring factory, subjected to the Seveso directive, Norsk Hydro. To avoid the leak of waste in the Loire, prompt asphyxiation, limed fishes, or the obstruction of the gills, a lagoon with geomembrane had to be dug very quickly close to the place of the accident. Molasses in the sea is not regarded as a toxic event, but molasses in an inland water body constitutes an ecotoxicological risk "To fall into the molasses", in the French words, is not good for the eels and salmons. In February 2001, the tanker *Kristal*, Erika generation, and like Erika under the Maltese flag and classified by RINA, broke into two and sunk in the Bay of Biscay; it was transporting 28,000 T of molasses, 11 men from the crew died in the shipwreck. The use of a tanker like the *Majori* in the upstream of the Loire estuary is imprudent. In addition, the maritime inspection of Nantes/Saint-Nazaire did not answer our mail on the absence of a safety visit on board the *Majori* during her stopover in the port.

**Descartes.** In the previous bulletin, issue #8 of Ship-breaking.com, it was mentioned that the gas carrier *Descartes* was disarmed in Marseille and that it should possibly be demolished there if the plan of naval deconstruction in the form #10 is carried out in Marseille. (see [http://www.robindesbois.org/english/shipbreaking8.pdf](http://www.robindesbois.org/english/shipbreaking8.pdf), page 1, In response to our letter, Gaz de France said that « considering the marks of interest received for the ship presently charter-free, the enterprise comes to present it for market sale." If failing, the ship will be dismantled scrupulously respecting the regulations in force, particularly relating to asbestos". Of the 10 liquefied gas carriers which left for breakage between March 16 and June 29, 9 ships were built after the *Descartes*, including 3 ships in French shipyards: *Maharshi Vishwamitra* in 1974 in the Chantiers de France, Dunkerque, *Gas Al Burgan* in 1979 in the Chantiers Navals de La Ciotat, and *Al Bida* in 1979 in the Chantiers de l'Atlantique, Saint-Nazaire. Concerning a methane tanker generating important risks and exposed to sloshing (internal waves of liquefied gas) it seems reasonable to withdraw from the fleet the *Descartes* which was launched in 1971, including as floating storage. It would remain on this assumption to define and locate the methods of the extraction of asbestos. The letter from Gaz de France specifies that "asbestos are catalogued, charted and confined". To note - a problem always ignored in the demolition of ships transporting natural gas - is that of the technologically enhanced natural occurring radioactivity presently by the form and traces of radium and its remnants.

**On standby**

**Otapan.** The *Otapan* arrived in Rotterdam on February 23, 2007, after being towed back from Turkey where her dismantling had been finally refused by the Turkish authorities for environmental, medical and political reasons (see in the bulletin 2006, page 18, [http://www.robindesbois.org/english/shipbreaking.pdf](http://www.robindesbois.org/english/shipbreaking.pdf)). This has not prevented the same authorities from accepting 5 ships since the beginning of the year which are not asbestos-free nor purged of other pollutants, in particular *Orestes*, a ferry laid up for several years in Bari (Italy) and *Slops X*, a Greek tanker victim of a fire. The extraction of asbestos was to be completed at the end of June, without knowing in which shipyard the *Otapan* would be scrapped thereafter. On June 23, there was a fire in the engine room. The causes of the fire are not known to date.
Colbert. A vessel with a history and a bidet fixed especially for Mrs. de Gaulle while accompanying her husband in a transatlantic voyage towards Quebec in 1967, Colbert was towed towards Brittany after having been exhibited and visited on the quays of the Gironde in Bordeaux from June 1993 to June 2007. Immediately after the departure of Colbert, other colourful ships with a history or passengers, like the Belem and the Arctic Sunrise of the Greenpeace ship-owner came to decorate the quays of the city of the brief State Minister of Ecology, Sustainable Development and Spatial Planning. Ex-seal hunter and conveyer of heavy material bound in the Antarctic for Terre-Adelie under the name Polar Bjorn, the Arctic Sunrise is under the threat of demolition. Robin des Bois hopes that the ship-owner will not give up the inclination to value its ex-ships in artificial reef. There is not much time, in September 2006 in Tallinn, the Arctic Sunrise was inspected by the Estonian harbor authorities which detected 4 infringements, one of which to appendix I of MARPOL on the prevention of pollution by hydrocarbons. With respect to Colbert, it is today in Landevennec bay near sighted Brest. The mayor is very pleased. The demolition is planned for 2010 after carrying out a cartography of pollutants and after using the ship as spare parts storage for vessels of the same generation fated for the tomb, like the frigates Tourville and de Grasse and the helicopter carrier Jeanne d’Arc whose final fate without a doubt will be one of the most controversial of the topicality 2010-2020.

Blue Lady (ex-Norway, ex-France). Pure symbol of the double language of Europe and India in regards to the demolition of the ships, full of binded and dispersed asbestos, started from Bremerhaven right under the nose of NGO clouded by the Clemenceau and finally with complicity of all (see the press release of Robin Des Bois "The Love Boat", http://www.robindesbois.org/english/sea/Love_boat_06.html, January 13, 2006), the steamer was beached in the bay of Alang in mid-August 2006. May 16, 2007, the Indian Supreme Court authorized the demolition site Priya Blue to empty the residual oil of the tanks but not yet the demolition.

Left to breakage
From March 16 to June 30, 2007, 92 ships left for the demolition, 41 to India (45%), 31 to Bangladesh (34%), 8 to Pakistan (9%) and 5 to Turkey (6%). India precedes Bangladesh in the number of ships to be demolished and in tonnage with nearly 240,000 T of metals compared to 234.00 T. Pakistan and Turkey are modestly present on the market. For bid prices by the demolition contractors, Bangladesh remains highest, especially with regard to the tankers which regularly reach $500/ton. India continues to buy ships with a large added value and established a new record with the chemical tanker Jo Rogn by paying $1,000/ton. By way of comparison, 2 ships belonging to the US MARAD (Maritime Administration of the United States), one of which the replenishment tanker Maumee built in 1956, were sold for about $400,000 to the demolition site ESCO Marine of Brownsville, Texas, at $50/ton. Of the 92 ships left to breakage, 45 are oil tankers, chemical tankers, gas carriers (that is to say 50%). 9 passenger ships left for the Indian, Bangladeshi, Turkish or even Canadian demolition sites, often after a more or less long period of abandonment. 29 ships are under European flag or have European ship-owners (or the European Free Trade Association). The age of these ships at the end of their lifetime is between 18 years and 51 years; the average age is 32 years. 51 has a length lower than 150 m, 25 measure between 150 and 199 m and 15 between 200 and 290 m. The cumulative demolition will allow for the recycling of more than 570,000 tons of metals.

Since January 1, 2007, 171 ships were sold for demolition, a 30% increase compared to the figures from the previous year. To note- the emergence of the Tuvalu flag adopted as the flag for the last journey. From the period of March 16 to June 28, 2007, many of the ships leaving for breakage were held up beforehand with their crews in world ports (32 ships, 35%, the rate going up 72% for the bulk carriers and general cargo ships). The clean up continues for tankers: 45 ships (against 21 for the same period the year before). None of these ships were subjected to preliminary extraction of hazardous materials.
Ship and crew detained in a port for deficiencies

- single hull tanker banned from transporting heavy fuel in European waters or deviated from European Exclusive Economic Zone (EEZ)

![Image of Maumee, Buffalo, 23 mai 2005](https://example.com/maumee.jpg)

**Miguel I.** Tanker. 135 m long, 3.859 t. Comoro Island flag. Classification society, Polski Rejestr Statkow. Built in 1967 in Kudamatsu (Japan) by Kasado Docks, the shipyard which built *Erika*. Owned by International Maritime Cargo (Nigeria). Sold for demolition to India.

**Nand Hari (ex-Scandic Venture).** Tanker. 148 m long, 5.305 t. Indian flag. Unknown classification society. Built in 1981 in Koje (Korea) by Samsung Shipbuilding Co Ltd. Owned by Essar Shipping (India). Sold as is in Vigaz (India) for demolition to Bangladesh. $510/ton.

**Slops X** (ex-Quebec, ex-Dagrun, ex-Dakila, ex-Lucerna, ex-Baraka, ex-Alrai, ex-Athelmonarch, ex-TN Topaz). Tanker. 182 m long, 10.642 t. Greek flag. Built in 1975 in Lauzon (Canada) by Davies Shipbuilders Ltd. Owned by Ikologiki Naftiki (Greece). This company and Hellenic Slops (the ship manager) belong to the Gerry Ventouris maritime galaxy (Byzantio, Kifangondo, Junior M, Gatteville, Goury, Han...). Hellenic Slops bought the Gatteville in Cherbourg in 2002 to replace the floating storage Slops, who had been victim of a fire (see the press release « SOS Gatteville », [http://www.robindesbois.org/communiques/mer/fortune/2002/040302.html](http://www.robindesbois.org/communiques/mer/fortune/2002/040302.html)). Today, the Slops X, also damaged following a fire, was sold as is in Piraeus for demolition under consideration in India then finally to Turkey. $240/ton.

**Chemical tanker**

Gas carrier

Gas Aguila (ex-Gas Libra). Gas carrier. 228 m long, 20,573 t. Mongolian flag. Classification society, Nippon Kaiji Kyokai. Built in 1980 in Yokohama (Japan) by Mitsubishi Heavy Industries. Owned by Eagle Maritime Co Ltd (Japan). Detained in 2004 in Shenzen (China). Left the Panamanian flag for the Mongolian flag for its last journey towards Aguila. Sold as is in Singapore for demolition in Bangladesh with more than 1,000 t of fuel. $440/ton.

Gas Al Burgan (ex-Gas King). Gas carrier. 231 m long, 19,870 t. Kuwait flag. Classification society, American Bureau of Shipping. Built in 1979 in La Ciotat (France) by the Chantiers Navals de La Ciotat. Owned by Kuwait Oil Tanker Co (Kuwait). Sold as is in Fujairah. Sold for demolition to India. $404/ton.

Havfru, Taman River (Tasmania) 2005 © George Brzezina

Kornilia (ex-Petrogaz II, ex-Nippo Maru n°70). Gas carrier. 54 m long, 440 t. Greek flag. Classification society, Nippon Kaiji Kyokai. Built in 1965 in Osaka (Japan) by Mitsui Engineering & Shipbuilding Co Ltd. Owned by Stefanaus Shipping (Greece). Sold for demolition to Turkey.

Maharshi Vishwamitra (ex-Hemera,). Gas carrier. 207 m long, 14,338 t. Indian flag. Classification society, Lloyd’s Register of Shipping. Built in 1974 in Dunkerque (France) by les Chantiers de France - Dunkerque. Owned by Varun Shipping Co Ltd (India). Sold as is in Colombo (Sri Lanka) for demolition in Bangladesh. $458/ton.

Cement carrier

Ferry

Nindawayma (ex-Ontario n° 1, ex-Skudenes, ex-Manx, ex-Manx Viking, ex-Monte Castillo). Ferry. 101 m long. Canadian flag. Unknown classification society. Built in 1976 in Gijon (Spain) by SA Juliana Constructor Gijonesa. Owned by Ontario Northland Marine (Canada). Laid up for several years in Montréal before being sold for demolition to Canada.

Orestes (ex-Igoumenitsa Express, ex- Sifnos Express, ex- Sifnos, ex- Atlas I, ex- Cerdic Ferry). Ferry. 110 m long. Panamanian flag. Classification society, Hellenic Register of Shipping. Built in 1961 in Troon (United Kingdom) by Ailsa SB Co Ltd. Laid up in Bari (Italy), it was finally sold for demolition to Turkey.

Pallada (ex-Athina I, ex-Brindisi, ex- Rafaello, ex-Ierapetra, ex-Ariane 1, ex-Sunboat, Ex-Ferry Hankyu). Ferry. 127 m long, 4,326 t. Ukraine flag. Classification society, Shipping Register of Ukraine. Built in 1968 in Japan. Owned by Vival Marine Ltd (Ukraine). Detained in 1998 in Pirée (Greece), in 1999 in Brindisi (Italy), and in 2001 in Patras (Greece) and Brindisi (Italy). Sold for demolition to India.

RoRo vessel

Car carrier

Container ship

Frankfurt Express. Container ship. 287 m long, 24.875 t. German flag. Classification society, Germanischer Lloyd. Built in 1981 in Kiel (Germany) by Howaldtswerke Deutsche Werft AG. Owned by Hapag Lloyd AG (Germany). Sold for demolition to India. $425/ton.

Quan (ex-Le Yu Quan, ex-Yong He, ex-Onto Star, ex-Jin Zhan, ex-Host Country, ex-OOCL Ambition, ex-Xiang Shan). Container ship. 104 m long, 2.193 t. Tuvalu flag. Classification society, China Classification Society. Built in 1979 in the United Kingdom by Swan Hunter Shipbuilding Ltd. Owned by SITC Ship management (Chine). Detained in 2002 in Kobe (Japan), in 2004 in Incheon (Korea) and in 2007 in Hong Kong. Sold for demolition to Bangladesh, the flag passed from Panama to Tuvalu.

S.Queen (ex-HS Hongkong, ex-Fangcheng, ex-Fang Cheng, ex-Ryfjell, ex-Quarzarzate). Container ship. 93 m long, 1.300 t. Cambodian flag. Classification society, Bureau Veritas. Built in 1975 in Hambourg (Germany) by JJ Sietas Schiffswerft. Owned by Hongzhou Shipping Co Ltd. Detained in 2002 in Hambourg (Germany) and in 2003 in Avonmouth (United Kingdom). Sold for demolition to India.
Barge carrier.

Fish factory ship
*Atom* (ex-*Akebono Maru n°* 73). Fish factory ship. 107 m long 3,446 t. Sierra Leone flag. Classification society, Russian Maritime Register of Shipping. Built in 1973 in Fukuoka (Japan) by Fukuoka Zosen KK. Owned by Moryak Rybolov Co (Russia). Sold for demolition to Bangladesh.

Fishing ship
*Rybak Amura*. Fishing ship. 54 m long, 818 t. Russian flag. Built in 1987 in Germany (ex Democratic Republic). Owned by Eko Fish Ltd (Russia). Sold for demolition to India.

Reefer
**Grifas (ex-Bata)**. Reefer. 55 m long, 583 t. Russian flag. Classification society, Russian Maritime Register of Shipping. Built in 1974 in Russia. Fish factory ship converted to reefer for the transport of fish. Owned by Fishery Industrial Association Murmanrybprom Co (Russia). Sold for demolition to India.

**Rokishkis (ex-Rokiskis)**. Reefer. 65 m long, 1,069 t. Russian flag. Classification society, Russian Maritime Register of Shipping. Built in 1970 in Wismar (Germany, ex-Democratic Republic) by VEB Mathias Thesen Werft. Fish factory ship converted to reefer for the transport of fish. Owned by Fishery Industrial Association Murmanrybprom Co (Russia). Sold for demolition to India.

**General Cargo**

**Iran Adalat (ex-Arya Sepehr, ex-Iran Sepehr)**. General cargo. 166 m long, 8,170 t. Iranian flag. Classification society, Germanischer Lloyd. Built in 1977 in Yokosuka (Japan) by Sumimoto Heavy Industries. Owned by Islamic Republic of Iran Shipping Lines (Iran). Sold for demolition to India. $455/ton.

**Mariam Trans (ex-Lady Nuhad, ex-Salem, ex-Carebeca, ex-Carabeka I, ex-Hanseatic)**. General cargo. 78 m long, 853 t. Sierra Leone flag. Unknown classification society. Built in 1966 in Rostok (Germany) by VEB Schiffswerft Neptun. Owned by Fadhel MA (United Arab Emirates). Detained in 1999 in Thessalonique (Greece). With the drift on May 21, 2007, it transported scrap from Iraq towards India. The crew was saved and the ship towed for demolition in India where it arrived on May 24.

Bulk carrier

Golden Trust n°3 (ex-Ganghai 616, ex-Hao Fa, ex-Amos, ex-Continental Carrier, ex-Packing). Bulk carrier. 178 m long, 7,300 t. Panamanian flag. Classification society, Panama Shipping Register Inc. Built in 1971 in Osaka (Japan) by Namura Shipbuilding Co Ltd. Owned by JinXin Ocean Shipping (China). Detained in 2006 in Guangzhou (China). Sold as is in China for demolition in Bangladesh. $400/ton.

Opportunity (ex-Conger, ex-Asian Union, ex-Global Episode, ex-Shoho Maru). Bulk carrier. 222 m long, 12,765 t. Panamanian flag. Classification society, Bureau Veritas. Built in 1981 in Nagasaki (Japan) by Mitsubishi Heavy Industries. Owned by Oceansmart Shipping Ltd (Cyprus). Detained in 1999 in Lisbonne (Portugal), in 2005 in Vancouver (Canada) and in 2006 in Zhangjiagang (China). Sold as is in Fujairah (United Arab Emirates) for demolition in India. $408/ton.
